Factory Repair Center Training Policy

Repair Center training will be supplied to companies specified by our Product Specialist. At no charge to the attending company, Benner-Nawman will supply in-depth repair / maintenance training. The attendees must supply their own airfare and / or ground transportation to and from our facility. Benner-Nawman will supply transport to and from the Sky Harbor International Airport to our Wickenburg, Arizona Plant, Accommodations, Meals, and Local Transportation.

3 weeks notice is required to request a training date. All schedules must be coordinated with and approved by Brian Young, Benner-Nawman Training Instructor.

The training procedure will consist of the following:

All attendees are to study the “Handling Instructions” booklet and become familiar with its contents prior to arrival. This booklet will be used as a guideline for the actual “hands on” training.

***Rebar Cutters:** A unit will be completely disassembled. Each component will be reviewed and its function explained. The tool will then be re-assembled and tested for maximum cutting pressure.

***Rebar Benders:** Training will include partial disassembly. There will be complete review of the inner-workings. Specifically clutch adjustments, electrical components, and preventative maintenance.

All training will be conducted at our Wickenburg Plant / Corporate Headquarters.

For more details, please contact your sales representative or our Customer Service Department at (800) 992-3833
