Highway-ready rebar cutting and bending goes where you need it.

DIAMOND®

**TUBC-25X
 Trailer Unit**

ReBarRunner™

"Makes a great rental unit"

This is an affordable portable rebar fabrication unit. It simply combines the very reliable DBD-25X rebar bender and the DC-25X rebar cutter. Both are firmly mounted together on a heavy-duty customized utility trailer.

The advantage to owning this unit is production, the bender table is at the ideal working height and both the bender and cutter can be used hands free with the standard foot pedal control. This trailer unit comes standard with a weather protected electrical control box, 24" storage tool box, 4" heavy duty workshop vise, one front jack stand, two rear stabilizer jack stands, 2" diameter ball hitch coupler, running lights, wiring harness, safety chains, 14-gauge diamond thread steel bed, 46"x 60" bed size, a rebar cutter guide roller, a space for securing and transporting up to a 6 KW gasoline generator, six tie-down hooks and straps, two ST175/80D13 tires, 2,200 lb. capacity axle, rust-resistant finish, and the DBD-25X bender & DC-25X rebar cutter. Our one (1) year warranty includes parts and labor. Spare tire holder & spare tire are optional.
